/ 1. Glossary

En el glosario de esta unidad, encontraremos expresiones que nos permitirán utilizar un vocabulario adecuado al contexto en que nos encontramos en nuestra familia profesional. Para ello, estudiaremos los términos que encontramos a continuación.

- A **workstation** is a powerful computer that can process complex tasks that typical desktops cannot handle, such as advanced graphics design.
- A **computing cluster** is an extremely powerful computer designed to process large quantities of data.
- An **embedded computer** is a computer that is a part of a larger product.
- A **server** is a central computer that provides services or stores data for many other computers.
- **Bit** stands for Binary Digit. It is a digit in the binary system that represents values of 0 and 1.

/ 2. Listening

En este apartado practicaremos la comprensión oral. En el audio escucharemos una conversación entre dos ingenieros. Completa los huecos con las palabras que faltan y añade estos conceptos a tu vocabulario para poder utilizarlas cuando las necesites.

1. Listen to a conversation between two engineers. Mark the following statements as True or False.

A. The woman finished developing a program for desktops.

B. The man recommends creating another application for laptops.

C. The woman plans to make the program work with a touchscreen.

2. Listen again and complete the conversation.

Engineer 1: Hey, Grace. What are you 1)_____ on?

Engineer 2: I'm still developing the home banking application.

Engineer 1: Wait, didn't you 2)_____ that already?

Engineer 2: Well, sort of. I finished a version for 3)_____ and desktops.

Engineer 1: So what are you doing now?

Engineer 2: Next, I'm going to create an application for 4)_____.

Engineer 1: Oh, that's a good idea. Lots of 5)_____ carry tablets nowadays.

Engineer 2: Right. That's why this 6)_____ needs to work well with a touchscreen.

/ 3. Reading

En este apartado, vamos a trabajar la comprensión escrita culminando el tema de los saludos en distintas culturas. Lee el texto, señala el nuevo vocabulario y realiza el ejercicio que se muestra a continuación.Listen and read this extract from an etiquette guide. Then choose the correct answers.

Fig.1. Computers

Types of computers

They create programs for our home PCs. They also develop advanced software for government **computing clusters**. They help us connect multiple **workstations** to massive corporate **servers**.

Home **computers** were a luxury just a short time ago. People felt lucky to have bulky desktops in homes and businesses. Now these computers are smaller and more powerful. Many people use **laptops** or **notebooks** instead. Tablets provide added mobility. And now people can install **embedded computers** just about anywhere. This is all possible because of software engineers. The software development industry strives to make life easier. So from all of us at The Weekly Techie: thanks, software engineers!

Audio Reading. "Types of Computers"
https://on.soundcloud.com/EwdzJLQxPyWkZd1AA

Read the journal article. Then, choose the correct answers.

1. What is the main idea of the article?

   a. Recommendations for computer purchases

   b. The challenges of today's software engineering industry

   c. The equipment that a computer company manufactures

   d. Technology arising from advances in software development

2. According to the article, which of the following is NOT something that software engineers do?

a. Create programs for individual use on PCs

b. Develop complex software to run on government computing clusters

c. Connect many computers to large corporate servers

d. Increase the size of desktops for homes and businesses

3. What opinion does the article express about software engineering?

a. It is expanding more quickly each year.

b. It is responsible for improving many areas of people's lives.

c. It is a good area in which to start a successful career.

d. It is a subject that everyone should be educated about.

2. Match the words with the definitions (A-E).

A. A very small computer that typically does not have a keyboard	desktop
B. A hinged computer that is easy to transport	laptop
C. A computer that is intended for personal use	tablet
D. A powerful computer that processes advanced tasks	PC
E. A computer that is intended for use in one location	workstation
