/ 1. Glossary

En el glosario de esta unidad, encontraremos expresiones que nos permitirán utilizar un vocabulario adecuado al contexto en que nos encontramos en nuestra familia profesional. Para ello, estudiaremos los términos que encontramos a continuación.

- A **markup language** is a system for displaying a webpage's content and formatting instructions, and is not seen in the final displayed version of the text.
- A **hyperlink** is a link on a webpage that can be clicked to open another webpage.
- A **website wireframe** is a framework or outline of a website's layout and navigation systems.
- A **programming language** is a system of communication that tells a computer what to do, usually involving how to process or display information from a markup language.
- A **web content management** system is software that allows people to create and manage webpages without extensive knowledge of programming and markup languages.

/ 2. Listening

En este apartado practicaremos la comprensión oral. En el vídeo escucharemos una conversación sobre el diseño de una página. Después, completa las preguntas sobre la conversación.

Video Listening. "Web Design"

1. Listen and choose the correct answer.

A. How many media queries can you establish?

a. very many

b. just a few

B. How many columns are there in this design firm's site on phone size?

a. one

b. two

C. Does navigation change when viewed on smaller screens?

a. yes

b. no

D. How does the size of the screen affect the images of the site on display?

a. The images are not affected.

b. The images change size.

E. How many uses do media queries have?

a. on one-page layouts only

b. many various ways

F. How many media queries were used to address the text sizing issues?

a. two

b. nine

/ 3. Reading

En este apartado, vamos a trabajar la comprensión escrita con este texto sobre la descripción de un curso de introducción al diseño web. Lee el texto, señala el nuevo vocabulario y realiza el ejercicio que se muestra a continuación.

GRD120:
Intro to web Design

This course examines the components of a webpage. Learn the proper **coding** to design your own website wireframe. You will start by converting basic text and formatting into a **markup language**. Learn the differences between languages like **HTML** and **XHTML**. Then learn **programming languages** that determine how your webpages behave. The course focuses on **CSS** and **XSL**. You will also implement site navigation using **JavaScript**.

This course is strongly recommended for all graphic design students. Discover much more freedom than **web content management systems** can offer. You will acquire the tools needed to create a unique, functional website. You may want to improve access to your site with **QR codes**. **FTP** will let you share information securely with particular users. Set up **hyperlinks** to ease site navigation.

Fig.1. Intro to web design.

If you're planning to study web design, start here. If not, these skills are still important. You may simply need a good website to display your portfolio. Whatever your goals, GRD120 is vital to your design education.

Audio Reading. "Intro to web design"
https://on.soundcloud.com/NTS5iMwLFZkXXtTz7

1. Read the course description. Then, mark the following statements as True or False.

Students must know programming languages before enrolling.

The course mostly focuses on web content management systems.

The course is recommended for students who are not pursuing web design.

2. Place the words under the correct headings.

› *HTML · XSL · XHTML · FTP · CSS*

Markup language	Programming languages	Security systems
